Faculty Hiring: Reading and Resource Lists

The following reading and resource lists provide additional information about the research on assumptions and biases and how to minimize their impact throughout the faculty search and hiring process. Resources for advertising faculty position announcements and recruiting broadly are also provided. It is meant to supplement the booklet: “Faculty Recruitment: Best Practices for Diversity and Excellence,” developed by the Office of the Vice Provost for Academic Diversity and Lehigh ADVANCE, and existing faculty hiring resources on the Web site of the Office of the Provost.

Readings on Diversity, Gender And Faculty Recruitment

Smith, D. (2000). "How to Diversify the Faculty.” Academe, 86, no. 5. Washington, D.C.: AAUP. Enumerates hiring strategies that may disadvantage minority candidates or that might level the playing field.

Trix, F. and C. Psenka (2003). "Exploring the color of glass: letters of recommendation for female and male medical faculty." Discourse & Society 14(2): 191-220. Letters of recommendation for successful female and male medical faculty showed differences in terms used to describe them and in the length of letters. Letters for females were shorter than those for males; included more phrases expressing doubts; were more likely to include only minimal information; mentioned their personal life more often. Letters for males included more repetition of standout words like “outstanding”, and included more references to research, skills and abilities and career.

Turner, Caroline Sotello Viernes. (2002). Diversifying the Faculty: A Guidebook for Search Committees. Washington, D.C.: AACU. This guidebook offers specific recommendations to faculty search committees with the primary goal of helping structure and execute successful searches for faculty of color.

Valian, V. (1998). "Evaluating Women and Men." (Chapter 1 and Chapter 7.) Why So Slow? The Advancement of Women. Cambridge, Mass.: MIT Press. In this chapter, Valian presents research that demonstrates that men and women who do the same things are evaluated differently, with both men and women rating women's performances lower than men's, even when they are objectively identical.
Wenneras, C. & Wold, A. (1997). “Nepotism and sexism in peer-review.” Nature, 387, 341-343. This Swedish study found that female applicants for postdoctoral fellowships from the Swedish Medical Research Council had to be 2.5 times more productive than their male counterparts to receive the same “competence” ratings.

Wolf Wendel, L. E., S. B. Twombly, et al. (2000). "Dual-career couples: keeping them together." The Journal of Higher Education 71(3): 291-321. Addresses academic couples that face finding two positions that will permit both partners to live in the same geographic region, to address their professional goals, and to meet the day-to-day needs of running a household that, in many cases, includes caring for children or elderly parents.

Background Readings on Women’s Scientific Careers:

A Study on the Status of Women Faculty in Science at MIT. (1999). The MIT Faculty Newsletter, Vol. XI, No. 4. This is the original MIT report that has spurred so many other studies.

Hopkins, Nancy, Lotte Bailyn, Lorna Gibson, and Evelynn Hammonds. (2002). An Overview of Reports from the Schools of Architecture and Planning; Engineering; Humanities, Arts, and Social Sciences; and the Sloan School of Management. Massachusetts Institute of Technology. The overview of MIT’s more recent study of all of its schools.
